

## After plastic surgery

Most cosmetic or reconstructive surgeries require a minimum of 2 days of restricted movement and limited lifting, making this a critical time to have extra support at home.

## After eye surgery

Some eye surgeries require a person to lie down with complete relaxation for hours; others require that one's head remain in a certain position for up to 5 days, as well as to restrict driving and lifting.

## Who is Neighborly Home Care?

We are a local, independently owned senior home care provider. Our staff is made up of caring and dedicated individuals, who have the knowledge, experience, and desire to provide exceptional assistance to seniors.

**Our mission is to provide quality compassionate care to all of our clients, offering peace of mind to family members who are unable to be with their senior loved ones full-time.**

## When to use Professional Transportation Services

If you or a family member needs transportation for :

- Doctor visits
- Eye surgery
- Dental Surgery
- Cosmetic/Reconstructive Surgery
- Treatments such as chemotherapy

Our caring professionals will get you to and from appointments safely. As an added benefit, we will wait at the location until you are permitted to leave.

If follow-up care at home is needed, our caregivers can provide assistance during this recovery time, even staying overnight when needed.

## After dental surgery

Sometimes dental surgery recovery can compromise health or independence. We can assist with planning and preparing modified diets and medication reminders to facilitate optimal healing.

## After cancer treatment

Chemotherapy or radiation related to cancer treatment should be as stress-free and comfortable as possible. Our caregivers make this a top priority. Between managing medications, neuropathy, nausea, and fatigue, having assistance can make the difference between a difficult and smooth recovery.

**Neighborly Home Care offers transportation services, both for seniors needing assistance with regular appointments and errands, and for other individuals who need help after a surgery, treatment or hospital stay.**

Our day services are fully customized to make our clients comfortable and provide peace of mind to loved ones who worry from afar.

Day surgery services can include:

- Transportation to/from the appointment
- Note-taking to ensure details of conversations with medical professionals are captured
- Companionship and comfort
- Picking up prescriptions and medication
- Meal preparation
- Personal care services like assistance with bathing/dressing

### Pricing Packages:
